>8mm	>.32	\$ 30.00

You are encouraged to pick up your clams sometime in April, but prior to May 1st. After May 1st, we cannot guarantee that your order will be filled. (Planting clams during April ensures that the animals will reach their maximum shell length by the time that growth ceases in the fall.)

The mission of the Downeast Institute for Applied Marine Research and Education is to improve the quality of life for the people of downeast and coastal Maine through applied marine research, technology transfer, and public marine resource education.
