

RESPONSE TO HYPOTHESIS (LESSON 2 or 3)

Answer key

RESEARCH QUESTION - HOW DOES PREDATION AND TIDAL HEIGHT AFFECT JUVENILE CLAM SURVIVAL?

Students should be allowed to make their own responses for this question and the others below. There is no right or wrong. They are testing a hypothesis and what will or won't happen will not be known until the containers are collected and data is compiled. The Instructor should encourage the students' individual thoughts and ideas for this worksheet.

Hypothesis – Write two sentences addressing the above research question for each of the three tidal heights.
