

## KEYWORDS AND PHRASES WITH DEFINITIONS FOR LESSONS 9,10,AND 11

A few terms from previous lessons are included here for the convenience of the instructor

Adult clam -

Anus -

Anterior adductor muscle of clam -

Anterior adductor muscle scar

Anterior end of clam -

Bivalve -

Byssus -

Clam larva -

Chondrophore-

Crystalline style of clam -

Cultured clam -

Digestive gland of clam -

Digestive system-

Dorsal -

Egg -

Esophagus-

Excretory pore -

Excurrent siphon -

External Anatomy -

Fecundity -

Fertilization -

Foot -

Gill (of clam) -

Growth rings -

Gonad of clam -

## KEYWORDS AND PHRASES WITH DEFINITIONS FOR LESSONS 9,10,AND 11

Heart -

Hinge line adductor scar -

Hinge ligament -

Incurrent siphon -

Infauna -

Internal Anatomy -

Intestine -

Invertebrate -

Juvenile -

Labial palp of clam -

Left valve (of clam shell) -

Life cycle -

Mantle of clam -

Mollusk -

Mouth of clam -

*Mya arenaria* -

Muscle scar -

Nephridia (excretory gland) -

Organism -

Pallial line -

Pediveliger stage -

Periostracum -

Posterior adductor muscle -

Posterior adductor muscle scar -

Posterior end -

Rectum -

Shell (of clam) -

## KEYWORDS AND PHRASES WITH DEFINITIONS FOR LESSONS 9,10,AND 11

Siphon -

Spat

Sperm -

Stomach of clam -

Stress ring -

Style sac -

Trochophore -

Umbo -

Veliger -

Ventral -

Visceral mass of clam -

Voracious -
