

Performance Progress Report - NA10NMF4270214

Title: **Enhancing Sea Scallop Stocks in Eastern Maine through Applied Aquaculture
Research and Technology Transfer**

PI: **Brian Beal**

Organization: **Downeast Institute for Applied Marine Research & Education (Beals, Maine)**

Project Period: **June 1, 2010, through June 30, 2014**

Report Period: **June 1, 2014 through June 30, 2014 (Ninth Progress Report)**

Scallop broodstock were placed in conditioning tanks (7-8°C) in mid-June 2014 in preparation for another attempt to spawn them in early August 2014. Broodstock are being fed a diet of cultured microalgae similar to that which are fed to early veliger larvae (*Monochrysis lutheri* [CCMP 1325], *T. Isochrysis galbana* [CCMP 1324], and *Chaetoceros muelleri* [CCMP 1316]).
